Re: Pace Pacific Corp

To Whom It May Concern:

I understand you may be considering Pace Pacific Corp for construction of your new facility. Having just completed our move to our new facility we understand the magnitude of the project you are considering and the importance of finding the right construction company.

We recently moved into our new Health Care Facility, which was build by Pace Pacific. Now that construction has been completed we find we were very fortunate to have had our building completed by a company who takes genuine pride in their completed structure. We were also fortunate they had the integrity to remain on site until all aspects of our building had been completed. These delays were caused not by the construction of the building, but by other equipment orders and the ensuing installation, primarily in our dental area.

We have been very impressed with the quality and care that went into our building, as we were kept informed and involved by Pace Pacific Corp during the entire construction process. We were even informed of those items, which were overlooked by the architect during the planning of the building. Without the experience of the Site Manager provided by Pace Pacific we would have run in to several very costly items had the building been completed only as designed. Pace Pacific Corp was also very active in controlling costs to ensure the building was completed at or below our budgeted amount.

It is with great pleasure that we write this letter to recommend Pace Pacific Corp Construction for construction of any Health Care Facility. If you have any questions, please feel free to contact me at (775) 265-4215.

Sincerely,

Pam Thompson,
Operations Manager
Washoe Tribal Health Center
